

#	Terrain Type	Description	Notes
0	The Nothing	You are standing on the edge of well, nothing. The planet seems to have broken up into little pieces that drift about. In the distance a cute young twink is riding what looks like a giant feathered muppet and yelling something that sounds like moonchild. You ignore him, and get the feeling you should head back the way you came. (NOTE: Something is VERY wrong with the game. You should save your game and check for a update or at least get a new copy of the defworld.wad file!)	Not used in game – Display for debug only
1	Mountain Peak	You are at the peak of a mountain. You can see little but rain forest covered mountains and valleys for miles around. As you look carefully you think you might have caught a few puffs of smoke rising from the forest but your not sure.	60
2	Mountain Ridge	You are on the ridge of some form of a mountain. The terrain is rough and difficult to travel, but the ridge is easier to travel than the mountain side below you.	90
3	Mountain Side	You are on the side of what looks to be a heavily forested mountain. Giant trees and vines hang everywhere. It is difficult to navigate even a few feet, not to mention any distance.	240 min
4	Valley	You are in a thick rainforest valley. It's impossible to see very far either in front or behind you. The sounds of the local wildlife ring in your ears, but you are unable to see anything moving other than trees, vines and plants.	180 min
5	Jungle	You are in a think jungle. Movement is very slow and the sounds of wildlife ring in your ears, but you are unable to see anything moving other than trees and vines.	120 min
6	River	You are at a rivers edge. The water appears to be relativity calm, but it is moving at a rather rapid rate. Occasionally you can see the tell tail sign of life as some form of fish breaks the surface or a strange bird swoops in for a meal.	60 min (swim)
7	River Bridge	You are at a rivers edge and low and behold, an obvious sign of intelligent life! Across the river is an very old vine and wooden bridge. It's obviously old as moss has taken up living on both the wooden planks and the thick vines that hold it up, however the center of the bridge is clear, an obvious sign the bridge has been used at least relativity recently.	60 min
8	River Barge		90 min
9	City	* Special	
10	Island
